# Hey Alexa...
## Turn on my fireplace!

**SKYTECH**
CONTROL SYSTEMS

## INTRODUCING THE
# 8001

Control your fireplace with your smart speaker using your favorite smart plug.

Operation is simple. When the smart plug is turned on it sends power to the 8001 transmitter, and your fireplace will turn on. When the smart plug is turned off the power is removed from the 8001 transmitter and your fireplace turns off.

## Smart Plug Transmitter

The 8001 transmitter was designed to be used in conjunction with a smart speaker. It receives a power command to communicate with Skytech receiver.

## How it works

**SMART PLUG**  **ADAPTER**  **TRANSMITTER**

*NOT INCLUDED

Choose your favorite smart plug and control your fireplace with your smart speaker.

A power adapter comes with your 8001 system. If your smart plug has a USB port, the adapter is not necessary.

Communicates with your Skytech receiver to control your fireplace.
